01 Overview & Problem Statement

02 Key Insights & Opportunities

03 Plan & Execution Roadmap

04 Expected outcomes & Success Metrics

Overview

Buyhatke Cab Compare lets users compare real-time cab fares across Uber, Ola, Rapido, and Namma Yatri by entering source and destination, then redirects them to book directly. It extends Buyhatke's core deal-finding promise into daily travel, reinforcing its focus on smart savings and convenience.

Problem Statement

Problem 1

Low visibility & awareness

The feature is hidden within sub-menus, so most users remain unaware of Cab Compare's existence.

Problem 2

Limited engagement

Lack of route-saving, alerts, or rewards leads to low adoption and repeat usage.

Problem 3

Brand perception gap

Users primarily associate Buyhatke with shopping deals, not travel savings, limiting feature exploration.

KEY INSIGHTS AND OPPORTUNITIES

SWOT Analysis

Strengths • Strong brand trust in price comparison & savings within the Buyhatke ecosystem • Real-time fare comparison across multiple cab providers in a simple, intuitive flow	S W	Weaknesses • Low visibility & discoverability — feature hidden in sub-menus, leading to poor awareness • Limited engagement features — no saved routes, alerts, or personalization → weak repeat usage
Opportunities • Mobile-first user base aligns perfectly with cab-booking behavior • Scope to create synergy with Buyhatke’s tools (price alerts, rewards) to reinforce savings • Partnerships & referrals with cab providers can drive adoption & retention	O T	Threats • Competition from Google Maps & Uber integrating fare + ETA directly into navigation • User loyalty toward single cab apps limits active price comparison

Plan & Execution Roadmap

Phase 1: Visibility Boost (0–1 month)

- Add Cab Compare shortcuts on home/search pages.
- Push notifications & banners during peak commute hours.

Phase 2: Personalization & Engagement (1–3 months)

- Enable saved routes & fare-drop alerts.
- Contextual nudges (time/location-based).
- Launch Buyhatke Coins or cashback for frequent use.

Phase 3: Partnerships & Cross-Promotion (3–6 months)

- Collaborate with cab providers for exclusive offers.
- Integrate with price alerts & coupon deals for unified savings.
- Run targeted campaigns for students & commuters.

Phase 4: Continuous Improvement (Ongoing)

- Collect feedback & enhance UX.
- Track KPIs: feature visits, repeat usage, retention uplift.

Segmentation

Students, young professionals, and daily commuters who are price-sensitive and seek cab fare savings.

Targeting

Focus on mobile-first, deal-seeking Buyhatke users who frequently use cabs.

Positioning

A trusted, convenient tool extending Buyhatke's smart savings promise from shopping to daily commute by enabling quick fare comparisons across cab providers.

Key Outcomes & Success Metrics

Expected Outcomes

- Greater visibility and easy discoverability of the Cab Compare feature.
- Increased user engagement with more frequent usage per active user.
- Improved retention through personalized features like saved routes and fare alerts.
- Enhanced perception of Buyhatke as a comprehensive smart savings platform.
- Growth in cab bookings completed via Buyhatke's fare comparison.

Success Metrics

- Feature visits: Aim for a 20–30% increase in unique and repeat visitors within 3 months.
- Usage frequency: Target 15–20% of users engaging with the feature weekly.
- Retention uplift: Seek a 10–15% rise in repeat usage driven by personalization.
- Conversion rate: Strive for 8–12% of users completing bookings from Cab Compare.
- Campaign engagement: Achieve a 20–25% click-through rate on promotional prompts and offers.

Thank You!
